

# Take Advantage of the New Gov't Rebates

## Government Introduces Huge Rebates on Software Investments

For a limited time, the Canadian government is offering huge rebates to Canadian companies who invest in business-advancing technology, as part of the new Economic Action Plan.

This means, **if your business invests in Tailwind Transportation Management software, you may be eligible to write off 100% of the cost.**

For companies with taxable income in their current fiscal year, the purchase would have a similar tax effect as an operating expense in that it can be fully claimed in the reporting year purchased as a deduction from income for business purposes.

The company will be able to claim 100% of the software purchase price from their current taxable income **before January 31st, 2010.**

This is a temporary government offer, visit [www.budget.gc.ca/2009/plan/bpc3e-eng.asp](http://www.budget.gc.ca/2009/plan/bpc3e-eng.asp) and scroll down to "Providing Assistance to Businesses in All Sectors to Invest in Computers" for more details.

**"The cream of the crop in Transportation Software."**  
Dean Vincent, CANUSA Transport

**"Our company would not have survived without Tailwind Software."**  
Eric Weisen, NW Shippers

**"The best feature set at the best price. Period."**  
Lynda Pielechaty, Sea-Tac Transportation

**"Tailwind values me as if I was their only customer."**  
Justin Dumouchel, Cassidy's Transfer & Storage Ltd

**"We quickly and accurately track our customers' loads, and do not misplace or lose orders anymore. It has saved us time and money."**  
Jamie Plowman, Polar Express

**"I am able to immediately determine if PRO#s have or have not been paid to a driver. My old method was to look through every check they have received from us! This system is great for trucking businesses."**  
Dana Nemecek, A&J Transportation

**"Order entry and dispatching are easily handled with CMS. It's good value for the money spent and I would recommend it to others."**  
Yvonne Hebein, Motrux
