

Preparing for Catastrophe: A Tailwind White Paper

Vancouver, Canada (July 27, 2009) – Tailwind Management Systems has published its second Trucking Industry White Paper: Five Tenets of Catastrophe Avoidance.

“Being prepared, having a plan can make the difference between losing your business or losing a couple of days.” said Matt Chambers, Tailwind GM. “Backing your data up is a good first step but walking through the sorts of disasters which can hit your company can make all the difference.”

One Tailwind client lost his office to fire. Using online backup, renting temporary space and moving quickly, this client was back up and running within hours.

“Disasters – fire, computer crashes, extreme weather – happen more often than we like to think.” said Chambers, “Developing a plan and taking steps to make sure your plan can work can, literally, save your business. Our White Paper is a starting point for our customers and for the industry in general.”
